Robertson, D. Gordon E., 1950–  
Introduction to Biomechanics for Human Motion Analysis–Third Edition

Bibliography: p.  
Includes index.

1. Human mechanics. 2. Biomechanics. 3. Kinesiology.  
I. Robertson, D. Gordon E.

# CONTENTS

CONTENTS.....	iii
PREFACE TO THIRD EDITION.....	ix
PREFACE TO SECOND EDITION.....	x
PREFACE TO FIRST EDITION.....	xi
1. INTRODUCTION.....	1
1.1 History of Biomechanics.....	1
1.2 Taxonomy of Biomechanics.....	2
1.3 Units of Measure and the System International.....	4
Rules for Reporting Units in the Metric System.....	5
1.4 Conversion of Units.....	7
1.5 Numerical Accuracy and Significant Digits.....	10
Problems.....	12
References and Suggested Readings.....	13
2. FUNDAMENTAL CONCEPTS OF BIOMECHANICS.....	14
2.1 Space, Mass and Time.....	14
Space.....	14
Mass.....	15
Time.....	15
2.2 Force.....	16
2.3 Frames of Reference, Planes and Axes.....	16
Cardinal, Relative or Anatomical Frame of Reference.....	17
Anatomical position.....	17
Centre of mass and centre of gravity.....	18
Newtonian or Absolute Frame of Reference.....	20
2.4 Scalars and Vectors.....	20
Scalars.....	20
Vectors.....	21
2.5 Parallelogram Law for the Addition of Vectors.....	21
2.6 Coordinate Systems.....	23
Polar to Rectangular Coordinates.....	23
Rectangular to Polar Coordinates.....	24
Position Vectors.....	25
Problems.....	26
2.7 Spatial (3D) Coordinate Systems.....	27
Direction Angles and Direction Cosines.....	28
Problems.....	30
3. STATICS.....	31
3.1 Universal Law of Gravitation.....	31
3.2 Resolution of Forces into Components.....	34
Rectangular Components and the Unit Vectors.....	35

---

Addition of Forces by Summing Components.....	36
Problems. ....	37
3.3 Newton's First Law of Motion: Law of Inertia. ....	38
Equilibrium of a Particle. ....	38
First Law of Motion. ....	39
Resultant Force. ....	39
Forces on Rigid Bodies. ....	40
Principle of Transmissibility of Forces. ....	41
Moment of a Force.....	42
Problems. ....	46
3.4 Levers of the Musculoskeletal System.....	48
Classes of Levers. ....	50
First-class levers.....	51
Second-class levers. ....	51
Third-class levers.....	51
Mechanical Advantage versus Speed Advantage. ....	52
3.5 Laws of Statics.....	54
Moment of Force as a Vector Product.....	54
Laws of Statics.....	57
Free-body Diagram. ....	57
Indeterminacy.....	58
Free-body diagrams: Rules. ....	58
Steps for Solving Mechanics Problems.....	59
Problems. ....	62
3.6 Spatial (3D) Laws of Statics .....	65
Problems. ....	67
4. FRICTION.....	68
4.1 Laws of Dry Friction. ....	69
4.2 Empirically Determining the Coefficients of Friction.....	74
Problems. ....	78
References and Suggested Readings. ....	80
5. KINEMATICS.....	81
5.1 Linear Kinematics. ....	82
Displacement versus Distance.....	82
Displacement. ....	82
Speed versus Velocity. ....	83
Speed. ....	83
Velocity. ....	84
Acceleration.....	86
Constant Linear Velocity.....	89
Constant Linear Acceleration.....	90
Problems. ....	94
5.2 Projectile Motion.....	96
Problems. ....	101
5.3 Angular Kinematics.....	103
Angular Displacement.....	103

Radian measure. . . . .	103
Angular Velocity and Acceleration. . . . .	104
Constant Angular Acceleration. . . . .	104
Problems. . . . .	106
5.4 Relationship between Linear and Angular Measures. . . . .	107
Angular and Linear Displacement. . . . .	107
Angular and Linear Velocity. . . . .	107
Transverse velocity. . . . .	108
Angular and Linear Acceleration. . . . .	109
Transverse acceleration. . . . .	109
Radial acceleration. . . . .	109
Total linear acceleration. . . . .	109
Problems. . . . .	111
References and Suggested Readings. . . . .	113
6. KINETICS: FORCES AND MOMENTS OF FORCE. . . . .	114
6.1 Newton's Second Law: Law of Acceleration. . . . .	114
Problems. . . . .	117
6.2 Moment of Force. . . . .	118
Problems. . . . .	122
6.3 Moment of Inertia. . . . .	123
Problems. . . . .	129
6.4 Newton's Third Law: Law of Reaction. . . . .	130
Centripetal Forces. . . . .	130
6.5 Pseudo-forces (Centrifugal, Coriolis and g-Forces). . . . .	134
Problems. . . . .	136
6.6 Spatial (3D) Kinetics: Forces and Moments of Force. . . . .	137
References and Suggested Readings. . . . .	140
7. KINETICS: IMPULSE AND MOMENTUM. . . . .	141
7.1 Impulse-Momentum Theorem. . . . .	141
Linear Impulse. . . . .	142
Linear Momentum. . . . .	145
Application of the Impulse-Momentum Theorem. . . . .	146
Problems. . . . .	150
7.2 Angular Impulse and Momentum Theorem. . . . .	151
Angular Impulse. . . . .	151
Angular Momentum. . . . .	153
Problems. . . . .	155
7.3 Conservation of Momentum. . . . .	156
Conservation of Linear Momentum. . . . .	156
Conservation of Angular Momentum. . . . .	157
Problems. . . . .	163
7.4 Spatial (3D) Impulse and Momentum. . . . .	164
Linear Impulse and Linear Momentum (3D). . . . .	164
Angular Impulse and Angular Momentum (3D). . . . .	165
References and Suggested Readings. . . . .	166

---

8. KINETICS: WORK, ENERGY AND POWER. . . . .	167
8.1 Work-Energy Theorem. . . . .	167
Work on a Particle. . . . .	167
Work on a Rigid Body. . . . .	169
Mechanical Energy. . . . .	169
Mechanical work. . . . .	171
Problems. . . . .	174
8.2 Work of a Force or Moment of Force. . . . .	175
Work of a Force. . . . .	175
Work of a Moment of Force. . . . .	178
Problems. . . . .	180
8.3 Power. . . . .	182
Average Power. . . . .	182
Instantaneous Power. . . . .	182
Power of a force. . . . .	182
Power of a moment of force. . . . .	183
Problems. . . . .	185
8.4 Conservation of Mechanical Energy. . . . .	186
Conservative Forces. . . . .	186
Problems. . . . .	190
8.5 Mechanical Efficiency. . . . .	191
8.6 Spatial (3D) Mechanical Energy, Work and Power. . . . .	193
References and Suggested Readings. . . . .	195
9. FLUID MECHANICS. . . . .	196
9.1 Fluid Statics. . . . .	197
Density. . . . .	197
Relative density. . . . .	197
Pressure. . . . .	197
Pressure and depth. . . . .	198
Pascal's Law. . . . .	198
Archimedes' Principle. . . . .	199
9.2 Fluid Dynamics. . . . .	201
Drag Forces. . . . .	201
Terminal velocity. . . . .	202
Streamline Flow and the Bernoulli Principle. . . . .	203
Bernoulli's principle. . . . .	204
Lift Forces. . . . .	205
Magnus Effect. . . . .	206
References and Suggested Readings. . . . .	207
10. APPLICATIONS. . . . .	208
10.1 Gait Analysis. . . . .	208
Temporal and Stride Analysis. . . . .	208
Kinematic Analysis. . . . .	210
Kinetic Analysis. . . . .	211
Joint Power Analysis. . . . .	215
References and Suggested Readings. . . . .	218

10.2 Balance Control in Human Locomotion. . . . .	219
Basic Principles and Theory.. . . .	219
Comments about the Location and Size of the Base of Support . . . . .	221
Walking and Running. . . . .	222
Balance in the Elderly and in Neuromusculoskeletal Pathologies . . . . .	224
References and Suggested Readings. . . . .	224
APPENDIX A: TRIGONOMETRY. . . . .	226
Basic Trigonometric Functions. . . . .	226
Tangent function. . . . .	226
Sine function. . . . .	226
Cosine function. . . . .	227
Pythagorean Theorem. . . . .	227
Sine Laws. . . . .	227
Cosine Laws. . . . .	227
Inverse Trigonometric Functions. . . . .	227
APPENDIX B: ALGEBRA. . . . .	229
Order of Operators. . . . .	229
Term. . . . .	229
Factor. . . . .	229
Roots of a Quadratic Equation. . . . .	230
APPENDIX C: PLANE GEOMETRY. . . . .	231
APPENDIX D: VECTOR ALGEBRA. . . . .	234
Magnitude or Norm of a Vector. . . . .	234
Negative of a Vector. . . . .	234
Changing the Magnitude of a Vector. . . . .	234
Addition of Vectors. . . . .	234
Commutative Law for the addition of vectors. . . . .	234
Associative Law for the addition of vectors. . . . .	234
Distributive Law of scalar multiplication over addition . . . . .	235
Multiplication of Vectors. . . . .	235
By a scalar. . . . .	235
Scalar, dot or inner product. . . . .	235
Distributive property of scalar product over addition. . . . .	235
Vector, cross or outer product. . . . .	235
Distributive property of vector product over addition. . . . .	236
APPENDIX E: CALCULUS. . . . .	237
Differential Calculus. . . . .	237
Integral Calculus. . . . .	240
APPENDIX F: TABLES. . . . .	243

GLOSSARY. ....	247
BIBLIOGRAPHY. ....	252
INDEX. ....	253
ANSWERS TO ODD NUMBERED QUESTIONS. ....	261
EQUATIONS. ....	264
