Due to COVID-19 pandemic, most graduate courses are offered by distance (synchronously) for Fall 2020 and maybe Winter 2021.

INTRODUCTION

This guide is intended for students registered in one of the Graduate Programs in the School of Nursing and academic advisors/supervisors. In this guide, we aimed at presenting some key information about graduate studies in the School of Nursing at the University of Ottawa.

This School of Nursing Graduate Programs Guide should be used in conjunction with the information on the University of Ottawa website. Some of the important links are listed in this guide. The University of Ottawa policies and regulations for graduate studies are available at http://www.uottawa.ca/administration-and-governance/policies-and-regulations.

Our graduate programs are administered by the School of Nursing (Assistant Director for Graduate Programs) and the Faculty of Health Sciences in collaboration with the University of Ottawa Office of Graduate and Postdoctoral Studies.

GENERAL INFORMATION

Faculty of Health Sciences

The School of Nursing (SON) is located within the Faculty of Health Sciences. More information including resources and services is provided on their website.

School of Nursing

Information and news about the SON at the University of Ottawa is available online.

Graduate Programs Committee

Matters concerning the graduate programs of the SON are addressed by the Graduate Programs Committee. The Graduate Programs Committee consists of the Assistant Director (who is the Chairperson), full-time professors, joint appointees, the Nurse Practitioner Program Site Coordinator, and students from both the Master’s and PhD program.

Graduate and Postdoctoral Studies in Nursing

Overviews of all graduate programs, admission requirements, degree requirements and course descriptions are available on the University of Ottawa’s graduate program website. Academic regulations applicable to all levels of studies and those that are applicable to graduate studies are available on the Administration and Governance website.

Graduate Student Association (GSAÉD)

All full-time and part-time students enrolled in a graduate program are members of the University of Ottawa GSAÉD. The GSAÉD executive includes a president, a vice-president-internal, a vice-president-finance, a vice-president-communication, and a vice-president-service. Consult their website to learn more about the Association, the elected executive members, what they are doing, and how to get involved.

Registered Nurses’ Graduate Student Association (GNA)

The GNA represents graduate nursing students in the Master's and Doctorate studies within the SON at the University of Ottawa. The GNA is a department association of the Graduate Students Association Étudiants Diplômes (GSAED) of the University of Ottawa. The purpose of the GNA is to pursue a supportive environment for excellence in education and to promote participation of graduate nursing students regarding decisions and activities at the University of Ottawa. As a community, the GNA supports diversity, inclusivity, and respect for all members.

Throughout the academic year, the GNA hosts a number of free social and educational events. Each year, the GNA offers over $1,000 in bursaries for students in all graduate nursing programs. The GNA facilitates the “GradBuddy Program”, which is designed to help students transition into graduate studies and increase a sense of community among students.

Contact the GNA directly at: graduate-nursing@uottawa.ca.
ACADEMIC ADVISOR/THESIS SUPERVISOR

Academic Advisor

Upon admission to the program, every student who does not have a thesis supervisor is assigned an academic advisor who acts as a resource person for the duration of the student’s studies. The assignment of academic advisors is done according to the number of students that professors already have under their responsibility, research practice interests and the student’s language preference. Students are assigned academic advisors based on the information provided in the graduate students’ application. The number of students assigned to each professor usually varies. The SON aims to fairly distribute the graduate students among professors.

In August, the academic advisors are assigned and each professor is sent a list of the students’ names. As well, the students receive an email message notifying them of their academic advisor’s name and contact information. Students are expected to contact their academic advisor (or thesis supervisor) initially to schedule an appointment during their first term (refer to Appendix A for ways to prepare for this meeting). For advisors, Appendix B is a fillable outline for information to be discussed in the first meeting.

Graduate students registered in the MScN thesis option can speak with their advisor about finding an appropriate thesis supervisor. A complete list of professors and their research interests is available on the SON website.

Role of Academic Advisor

Besides acting as a resource for the student, the role of the academic advisor is to guide students academically. To fulfill this role, the academic advisor must possess a basic knowledge of the various aspects of graduate programs at the School of Nursing such as program descriptions, course information, and student program plans.

Other Resources Within Nursing

The academic advisor or supervisor is the main contact if graduate students have any questions or concerns about their studies. For concerns or questions about the program, contact the Administrative Assistant for Graduate Program at graduate.NUR@uOttawa.ca or the Assistant Director – Graduate Programs, School of Nursing at esi.grad.dir@uottawa.ca
GRADUATE COURSES

Course Descriptions

The Master’s and PhD course descriptions are on the Graduate and Postdoctoral Studies website.

Course Equivalencies

Course equivalencies for courses that were taken prior to admission to the program may only be approved by the Assistant Director of Graduate Programs Studies. To initiate this process, contact the academic secretariat at healthsc@uottawa.ca.

Course Registration

Students register for courses online through uoZone. The registration procedure is outlined online. To check the status of course registrations, refer to uoZone. All courses at distance are in real time.

Registration Requirements for Clinical Courses and Clinical Placements

In order to register for a course with a clinical component (all MScN and PHCNP), students must comply with the Faculty of Health Sciences requirements. A description of the requirements and the required forms to be completed are available on the Office of Risk Management website. The completed forms must be submitted to the Risk Management Nurse at NsgOttawa@uottawa.ca. These requirements are taken very seriously. If the SON does not comply with students meeting the requirements, they risk losing access to healthcare facilities.

Modification and Cancellation of Registration

Students wishing to modify and/or cancel a course must complete the Modification/Cancellation of Registration. This form must be submitted under “Modification or Cancellation of Registration” on uoZone for approval. Consult the University calendar for modification and cancellation deadlines or visit the Important Academic Dates and Deadlines webpage. If changes are made, students should update their course plan.

Course Schedules

The course schedules for all graduate programs are available on the University of Ottawa Course and Exam Timetables webpage. Please view both tabs – Basic Search and Advanced Search.
Fast-track to PhD

MScN students have the option to Fast Track into the PhD program after they have completed their four core Master's courses with a CGPA of at least 8.0. The application deadline for this transfer is the first Monday in May.

More information on the Fast-track from Master's to PhD is available here (scroll down the page). Graduate students should discuss the advantages and disadvantages of the fast-track with their thesis supervisor. Feel free to contact healthsc@uOttawa.ca with questions or concerns and/or the Assistant Director – Graduate Programs, School of Nursing at esi.grad.dir@uottawa.ca

Time Limit or Deadline for Graduate Studies

The MScN course must be completed within 4 years for both full time and part time students. The PhD in nursing program must be completed within 6 years. If graduate students have not completed their program by the deadline, they must submit a service request under "Extension of the time limit" in uoZone and have this approved. These extensions are approved under extenuating circumstances. For approved leave of absence (e.g. parental leave, medical leave), the time on leave is not counted within these time limits.
MASTERS OF SCIENCE IN NURSING PROGRAM – MScN

The goal of the program is to educate registered nurses for an advanced practice role and/or doctoral studies. Graduates of the program are prepared to assume leadership roles in improving the quality of nursing care in various health care settings. The program provides rigorous academic preparation based on theory and research to address health-related phenomena experienced by individuals, families, groups, aggregates, and communities.

Objectives

In support of the above goal, the faculty members of the SON are committed to assisting graduate students to achieve the following objectives:

- Critique, compare and contrast theories relevant to nursing.
- Demonstrate knowledge of a broad range of research methods.
- Apply advanced knowledge and competencies in the provision of direct nursing care in a specific area of nursing practice.
- Act as a consultant as required in complex care situations.
- Design and evaluate educational interventions for clients and families, colleagues, students and community.
- Foster the use of research findings in practice and initiate independent and/or collaborative research projects.
- Demonstrate professional, social, and political leadership skills needed to influence change in nursing and health care.
- Participate in interprofessional collaboration in planning, implementing and evaluating health care.

Program Options: Thesis or Clinical

The choice of thesis or clinical stream revolves around several issues. The decision should be made in consultation between the graduate student and his/her academic advisor or supervisor. During the first year (full-time) in the program, graduate students can make a request in UOZone to switch between thesis option and clinical option.

Program Duration and Course Sequence

A full-time student is expected to take 24 months (6 sessions) to complete the program. The program can be taken on a part-time basis over a maximum of four years. Not all courses are necessarily offered in each term. Electives can be taken at any point; therefore, it is important for graduate students to plan carefully with their academic advisor in order to meet all of the requirements within the time limit. Electives can be taken in nursing or in other graduate programs at the University of Ottawa.

It is strongly recommended that graduate students follow the course sequence provided on our website. A template that can be use to document progress through the program is available for both the MScN and PhD in this guide. Graduate students are encourage to bring their
completed program plan to the first meeting with their academic advisor or thesis supervisor. And when discussing any changes from the recommended sequence.

Research Rounds

Graduate students are expected to participate in research rounds to expand their knowledge on research methods and to network with other graduate students and professors. The SON offers research rounds routinely and there are other research rounds presented in the School of Epidemiology and Public Health and the Clinical Epidemiology Program at the Ottawa Hospital Research Institute.

Distance Education

All core and most elective courses are offered by distance modalities to students registered in the Master's distance program. Any questions regarding access to courses should be addressed to the professor of the specific course. Also consult the Distance Education webpage for a wide variety of useful tools for distance students.

Course Delivery

*Due to COVID-19, course delivery methods (face-to-face) may be by distance only for the 2020-2021 academic year.

Distance Courses

Courses where the professor and some students are in class and the remaining students from different regions are present and connected by audio and video during scheduled class hours. Within the MScN program, the distance option is available for most courses (only for students enrolled in the distance program). The course materials are usually available on Virtual Campus (Brightspace).

Online Courses

Online Courses. Courses where the professor is not physically present in the classroom; the course content is usually available on Virtual Campus (Brightspace). Courses are rarely provided as online courses. However, the professor may require virtual or physical presence in class during specific times (e.g., discussion periods, exams). Consult the professor's Brightspace course page for specific directives.

Master's of Science in Nursing with Diploma in Primary Health Care for Nurse Practitioner (PHCNP)

The Master's of Science in Nursing with Diploma in Primary Health Care Nurse Practitioner is a graduate level program that prepares students to be eligible for writing the extended class license. There are a total number of 45 credits. The courses require on-campus attendance and provide a virtual link to the other sites in the consortium of universities providing this program. The program may be completed in 24 months as a full-time student or 36 months as a part-time student. To qualify to write the examination consult College of Nurses of Ontario website.
Specialization in Women Studies

The Master's program in nursing (thesis option) participates in the collaborative program in women's studies at the master's level. This program was established for students wishing to enrich their training in nursing by including an interdisciplinary component in women's studies. The specific requirements of the collaborative program include two core “FEM” courses and a thesis on a topic related to Women's Studies. Students in the collaborative program must complete 3 credits in addition to those required in the regular program.

Students should normally apply for acceptance in the women's studies collaborative program at the same time as they apply for admission to the master's program in nursing. Consult the Institute of Feminist and Gender Studies website for more information.
### PROGRAMS – Choose a program and one option (if applicable). Ensure that the student meets all the program requirements in the designated time frame.

DOCTORATE IN PHILOSOPHY – NURSING – PhD

The goal of the doctoral program in nursing is to prepare scientists capable of conducting innovative research that result in new and significant contributions to nursing knowledge. The students engage in creative thinking, critical appraisal, and synthesis of scholarly work in their field of interest using a wide range of philosophical, theoretical, and methodological perspectives.

Objectives

The graduate of the PhD program will be prepared to:

- Demonstrate a commitment to the advancement of nursing knowledge that values diverse approaches to knowledge generation.
- Design and conduct original research relevant to the discipline/profession of nursing.

Program Duration and Course Sequence

The PhD program is full-time and students are expected to complete the program in four years. Not all courses are necessarily offered in each term; therefore, it is important for graduate students to plan carefully with their thesis supervisor in order to meet all of the requirements within the time limit. Electives can be taken in nursing or in other graduate programs at the University of Ottawa. Given you are already paying full-time fees, there should not be any extra charges for taking an elective for credit or for auditing purposes. For auditing, graduate students require permission from the professor.

It is strongly recommended that graduate students follow the course sequence provided on our website. A template for documenting progress through the program is available within this document. The completed program plan should be discussed with the thesis supervisor and particularly if making any changes from the recommended sequence.

Course Delivery

*Due to COVID-19, course delivery methods (face-to-face) may be by distance only for the 2020-2021 academic year.

"All courses are offered on-campus to students registered in the PhD program. After the student completes the required courses, they register for the Comprehensive Exam (NSG 9998). The comprehensive exam is typically completed in the 4th term of the program. Once the comprehensive exam is completed, students may register for the Thesis (THD9999)."

Research Rounds

Graduate students are expected to participate in research rounds to expand their knowledge on research methods and to network with other graduate students and professors. The School of Nursing offers research rounds routinely. There are other research rounds presented in the School of Epidemiology and Public Health and the Clinical Epidemiology Program at the Ottawa Hospital Research Institute.

Preparing a Thesis

The Guidelines thesis process of the Graduate and Postdoctoral Studies webpage introduces most aspects of preparing a master's or PhD thesis including: thesis supervision, topic registration, writing, annual progress reports, submission and evaluation, oral defence, university regulations, and information about many other helpful resources. The School of Nursing provides a document online describing a thesis by article(s) or monograph and describes when it is necessary to submit thesis information or progress reports into UOZone.

Thesis Regulations

The University academic regulation II-7 Theses are available online. Please follow these regulations.
FINANCIAL SUPPORT, AWARDS, PRIZES AND RESOURCES

Information about awards and financial support relevant to nursing graduate students can be found on the university website.

Financial Aid and Awards Service

The Financial Aid and Awards Service encourages University of Ottawa students to fulfill their dream of pursuing postsecondary education. The Service accomplishes this by providing students with access to a variety of financial resources, tools and information; by rewarding academic excellence with awards; offering valuable expertise on government loans and creating job opportunities for students through the Work-Study program.

Conference and Research Travel Grants

The Office of the Vice-Provost, Graduate and Postdoctoral Studies recognizes the importance of sharing with the broader scientific community the work of graduate students and postdoctoral fellows; therefore, travel and research grants are available for students. For more information, consult the form under Awards and Financial Support.

Teaching Assistantships (TAs) and Research Assistantships (RAs)

The SON offers teaching and research assistantships. Although priority is given to University of Ottawa admission scholarship holders, the School also awards assistantships to other students based on the availability of positions. These positions are posted under Student Jobs each semester (usually August, November/December, and March/April). Do not hesitate to contact the Administrative Assistant, Graduate Programs at graduate.nur@uottawa.ca for additional information. For full time graduate students, holding such employment must not exceed an average of 10 hours per week per semester.

Other Awards and Prizes for Graduate Students in Nursing

- Helen K Mussallem Prize (for travel)
- Yolande Maranger Sylvain Scholarship
- Doctor Maria O. Leite-Ribeiro Prize
- Alumni Nursing Scholarship Fund
- Dawn A. Smith Award
- Community Health Scholarship
- Jean Jenny Excellence Prize in Tertiary Health Care
- The McGee Trophy: Awarded annually to a student in the Doctoral program with the highest academic standing in the NSG 7100 – Theoretical and Philosophical Perspectives in Nursing course. This prize emphasizes the exceptional knowledge and utilization of innovative theoretical concepts in practice and research.
- Angéline Lefebvre memorial bursary

Please consult the University of Ottawa’s webpage Online Scholarships and Bursaries. This online tool gives access to a directory of the numerous scholarships and bursaries offered at the University of Ottawa. Many of these funding opportunities are only available to graduate nursing students so we encourage them to apply!

FREQUENTLY ASKED QUESTIONS (FAQs)

Q: What is the Student Academic Success Service (SASS)?

A: SASS provides numerous services that graduate students will find useful, including help with writing assignments at the graduate level. For more information, view their website.

Q: What is uoZone?

A: UoZone is the student portal for uOttawa’s main online tools, including:
- Course enrolment
- Student Centre
- Finances (e-bill, statement of account, tax information)
- Personal course schedule
- Admission application tracking

Q: How often do graduate students need to complete and submit a progress report?

A: Graduate students registered in a thesis stream need to complete a progress report yearly. This report is due by the end of August. The approval process often takes 1 to 2 weeks for approval of the supervisor, assistant director from the School of Nursing, and the vice-dean academic in the Faculty. We encourage graduate students to submit their progress report anytime between June and the end of July to avoid any negative consequences.

Negative Consequences:
- Please note that if the progress report is not submitted and approved at all the levels, access to register for the fall term will be blocked until the progress report is approved.
- Any scholarship may be suspended or cancelled.
- Not registering on time could have a major financial impact and may eventually lead to the academic file being closed.
- Another reason access to registering for the fall term will be blocked is if graduate students have run out of time. MScN thesis students have 4 years and PhD students have 6 years. When graduate students have run out of time, they need to request an extension and explain the extenuating circumstances justifying the need for an extension.

Q: If I am enrolled in full-time graduate studies, how many hours per week can I work as a TA/RA and work elsewhere?

A: According to the University of Ottawa, fulltime graduate students can only work to a maximum of 10 hours per week. If they are working >10 hours per week, they need to have it approved by completing the following form: https://www.uottawa.ca/graduate-studies/sites/www.uottawa.ca.graduate-studies/files/10h_e.pdf

The procedures to follow for this request can be found at the following link: https://www.uottawa.ca/graduate-studies/students/forms/request-exception
Q: What is the Virtual Campus (e.g. Brightspace)?

A: The Virtual Campus is the online spaces for graduate courses. The current program used for the virtual campus is Brightspace. Most courses will have a page on the Virtual Campus, where professors may post readings, lecture slides, or other useful information. Depending on what the professor has set up, graduate students may also be able to find their grades, submit assignments, and participate in forum discussions with classmates.

Q: How do I get my uOttawa card?

A: Students can order their uOttawa cards through the online order form. Due to covid-19, all on-campus uOttawa Card services are closed. The distribution of student cards is temporarily suspended and will resume in the fall.

Additional information about the uOttawa cards can be found at the following link: https://www.uottawa.ca/uottawacard/get-a-card.

Q: What are inter-university library cards?

A: Inter-university library cards allow graduate students to borrow library resources from participating libraries. In order to obtain a card, can go to any University of Ottawa library site – it is a quick and easy process. Simply present student identification, and then graduate students will receive an inter-university library card as well as a SmartLibrary Card (allows borrowing from the college libraries as well as Ottawa Public Libraries). Faculty may access these cards as well. For more information please see:

SmartLibrary Card: https://smartlib-bibliogen.ca
Canadian University Reciprocal Borrowing Agreement: http://www.curba.ca

Q: Is there financial support for publishing in online journals?

A: Financial support for open access publishing: https://scholarlycommunication.uottawa.ca/uottawa-initiatives/financial-support

Q: What modules do RA/TAs have to complete?

A: All TAs and RAs must complete the following workplace safety and preparedness modules prior to the end of the contract date. The following are examples:

- Worker Health and Safety Awareness
- Supervisor Health and Safety Awareness
- Violence Prevention
- Respect in the Workplace
- Accessibility Standards for Customer Service
- Working Together: The Code and the AODA

Students who successfully complete these modules received around $200 compensation. Thus, the hours do not count towards the RA/TA position hours.

Q: Are there any resources for international students?
A: The UO-ISA is an association run by students for students with the aim to promote the well-being of international students and increase intercultural exchanges on UOttawa campus. More information about this association can be found at the following link: https://www.cvuo.ca/en/clubs-list-eng/university-of-ottawa-international-students-association-uot-isa
For resources for international students, please visit the following: https://www.uottawa.ca/graduate-studies/international/study-uottawa/resources-international-students

Q: How can I arrange to have workspace in the School of Nursing?

Please note: these workstations are temporarily unavailable due to the COVID-19 pandemic; they will be available after the University reopens and resumes regular services.

A: Typically, we assign students workstations for the year. To request a workstation, please contact the Administrative clerk at sec.ESI.NUR@uottawa.ca and let him/her know how many days per week the workspace will be used. Some space is assigned to students who are using it regularly and we have ‘hotel’ space for students needing it less often/intermittently.

Q: How can I further develop my skills for teaching at the University?

A: The TLSS-Teaching and Learning Support Service at the University of Ottawa has a Certificate in University Teaching for students registered in a graduate program or as a postdoctoral fellow. https://tlss.uottawa.ca/site/en/attestation-en-pedagogie-universitaire
APPENDIX A
Student Check List

Contacting a Supervisor or Academic Advisor

When emailing a potential Supervisor (MScN thesis and PhD students):
- Refer to the School of Nursing’s list of Professors to see who may be eligible to supervise graduate students
- Look through their biographies and recent publications to see if their areas of research align with your research interests
- When emailing a Professor, be sure to include the following:
  - What program you are in (e.g., MScN thesis stream, or completed etc.)
  - Your updated CV
  - How your interests align with their research
  - Request a time to meet

When emailing your Academic Advisor (if you do not have a supervisor):
- Once they have been assigned, email them to schedule an appointment
- Be sure to include your name, program, current occupation, and any other pertinent information
- Include an updated CV

Preparing for your first meeting with your Academic Advisor or Supervisor:
- Bring the following documents:
  - Hard copy of current CV to review in person
  - Narrative Report that was submitted with your admission package (as per the law on confidentiality, this document in your student file is not accessible to the advisors or supervisors)
  - A copy of your completed personalized program plan

Students are responsible for keeping their program plan up to date and planning subsequent meetings with their academic advisor. The student and the academic advisor should discuss the frequency of meetings as well as topics to be covered at each meeting. Most graduate students meet with their advisor during each term and as needed.
APPENDIX B
Interview Guide for the Academic Advisor
