FACULTY OF HEALTH SCIENCES
Research Newsletter
January 2019

Faculty Success

Grants
Dr. Yan Burelle
La Fondation GO
“Mesenchymal Stem Cell Therapy for the Treatment of Genetic Mitochondrial disorders: A Proof of Concept in Leigh Syndrome French Canadian (LSFC)”
Dr. Angel Foster
CanWaCH
“Collecting Data on Sexual and Reproductive Health in Humanitarian Settings: A Global Initiative”
Dr. Josée Lagacé
capita foundation
“Virtual Reality for Auditory Training Therapy: A Pilot Study”

Congratulations !!

Do you know what fantastic research is taking place in our Faculty?
In 2019 let’s get to know each other better
The Research Office is now on Twitter
Follow us to receive news of your fellow researchers’ successes and highlights as well as events, funding information and deadlines.

Follow : @uOHealthRes

Please let us know of all the highlights in your career such as prizes, grants, interviews, community outreach, etc.
We want to know and we want to share.
Please email us at: fssrecherche@uottawa.ca

TRI-COUNCIL OPPORTUNITIES

CIHR – Project Grant Spring 2019
Registration Deadline: 2019-02-06
Application Deadline: 2019-03-06
Are you planning to submit an application?
Please advise the Research Office asap
fssrecherche@uottawa.ca
We will be supporting all applications with reviews and completeness verification

CIHR – Indigenous Component of Healthy Life Trajectories (I-HeLTI)
Team Grant
Application Deadline: 2019-05-01

NSERC - Discovery Frontiers – Call for proposals
Antimicrobial resistance in the environment
Launch: 2019-01-04

SSHRC – New Frontiers in Research Fund-Exploration
Early Career Investigators
NOI Deadline: 2019-01-11
Application Deadline: 2019-02-07
If you are interested in applying please notify the Research Office at fssrecherche@uottawa.ca as soon as possible.

SSHRC – Partnership Grants – Stage 1
Stage 2 by invitation only
February 2019 Competition
Application Deadline: 2019-02-15

SSHRC – Connection Grants
Research Data Management
Application Deadline: 2019-02-01

TRAINEE OPPORTUNITIES

Mitacs
Elevate Postdoctoral Fellowship Winter 2018
LOI Deadline: 2019-01-23
Application Deadline: 2019-02-06

Invitation
Workshop on writing a compelling lay summary
February 26, 2019 from 2:30 to 4:00pm
Registration

The Research Office: Dr. Jeffrey Jutai, Vice-Dean Research, Dr. AnneMarie Gagnon, Senior Research Advisor, Manon Danneau, Research Administrative Officer: fssrecherche@uottawa.ca http://health.uottawa.ca/research_fhs

### From the Vice-Dean’s Corner,

The start of the New Year is typically a time for prognostication. Among the top trends in health sciences research predicted by many sources for 2019, I have noticed a focus on population health. According to the Centers for Disease Control and Prevention, population health refers broadly to the distribution of health outcomes within a population, the range of personal, social, economic, and environmental factors that influence the distribution of health outcomes, and the policies and interventions that affect those factors. It includes efforts to use health care resources more effectively and efficiently to improve the lifetime health and well-being of a specific population. In addition to disease prevention, population health activities include promoting health and well-being. These activities are, of course, central to many of our Faculty’s interdisciplinary research programs and are part of our brand. They include expanding traditional population health research, which has relied on demographic variables, self-report survey methods and simple biomarkers, to embrace molecular analyses for exposure assessment and early signs of disease. At the same time, bioscience research is more fully appreciating the role for social determinants in disease incidence and mortality variance at the population level. Our interdisciplinary research programs offer critical insights in conducting population based interventions that show significant promise in improving health behavior, health policies and health care delivery. As we move ahead this year with developing our strategic plan, I look forward to stimulating discussion and debate on how best to describe and promote distinctiveness in population health research and other areas of research strength and opportunity for our Faculty.

Warmest wishes for 2019,
Jeff
