Vice-Dean's Corner

Funding mechanisms now include research agreements, service contracts and development funds in addition to more traditional grants from agencies and foundations. As research funding diversifies, procedures become more complex. It is not always easy for researchers to navigate the institutional financial process. At the pre-award stage, the various services at the Office of the Vice-President Research (OVP) are involved to ensure applications and agreements have the appropriate oversight, compliance, budget, procurement, and protection clauses in place, and that REB issues are flagged. Sometimes, lines between the responsibilities of Research Management Services and Innovation Support Services can be blurred. Our Research Office is here to assist researchers in navigating these processes. We invite you to contact our office (fssrecherche@uottawa.ca), for support in the preparation of all your research funding initiatives and to act as a liaison with the various services of the OVP. Researchers are encouraged to come to us as the first contact point in the system, to help avoid confusion and unnecessary delays.

Wishing you a happy and productive summer,
Jeff
